Technical Details

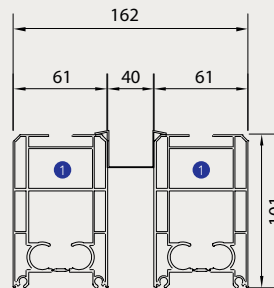

System has 15% inclination for better water drain. If this structure doesn't have these following features, Tecnodeck will not be responsible for possible knapsacks of water or similar problems concerning the running-off of rainwater. Flowing profiles number is indicative, inclinations are the least guaranteed for a correct outflow of rainwater. For inferior inclinations to least measures pointed in the table, it is possible to add one or more intermediary rails, except for technical office approval.
